

Commodore Waste Rock

Estimated volume of waste > 500000 cy

Nelson Tunnel

X

Historic Town of Creede is 1 mile downstream from the Site and near the Rio Grande

Driving the Bachelor Loop to view the rich mining history is a popular summer activity for vacationers.

Fishing is a popular activity for tourists and residents alike.

An Amethyst vein exists and rock hunting is popular in the lower part of the drainage above Creede.

Aftermath of Flood: downstream from Nelson Tunnel above Creede
